WAR CLOUDS OVER EUROPE

Soviet Russia Refuses to Halt Advance Into Warsaw

ARMY TO LOOT THE CAPITAL

Soviet Rejects British Demand To Call Halt On Advance Into Poland

Paris.—Great Britain has taken action to mobilize rapidly two divisions for service in Poland, according to the Matin, which adds that plans for transportation and re-equipping of this force have been prepared.

Negotiations between France and Great Britain for the purpose of devising means for aiding Poland are being pushed actively, other papers assert, and the bureau which has been negotiating war stocks has cancelled certain previous engagements.

Amsterdam.—A battalion of French riflemen quartered in Luxembourg have received orders to hold themselves in readiness to start for Poland, according to the Berlin Vossische Zeitung.

London.—The Herald, the Labor organ, says that the British North Sea squadron has been ordered to the Baltic Sea and that instructions have been issued to reimpose the blockade against Russia.

London.—The Russian Soviet's reply to Great Britain's call for a halt of the Bolshevik advance in Poland is a refusal, according to the London Times. The newspaper says the ground taken is that the armies would not obey an order to halt and will only be content when they reach Warsaw, which has been promised to them for loot.

The Times says the note to the British Government was received by Mr. Kamenetz, one of the Bolshevik envoys here, and was handed to Premier Lloyd George.

The Soviet Government repeats its willingness to join the proposed armistice conference, but refuses to agree to the admission to it of any of General Wrangel's representatives or other Russians who have taken up arms against the Soviet.

According to the Times, the note says the Bolsheviks are entitled both by military and international law to continue their advance until an armistice is concluded. They are, however, prepared to sign an armistice and cease hostilities immediately the Polish delegates return to the appointed place with power to accept an armistice.

The Bolshevik answer says it is felt this action is necessary because the Bolsheviks fear that without such an undertaking the armistice negotiations might be prolonged merely to enable Poland to receive reinforcements.

The answer further points out, says the Times, that the Soviet Government is prepared to offer Poland such an undertaking as will ensure independence and wider boundaries than are provided for in the treaty of Versailles.

The Soviet Government declares in the answer that its delegates now in London are empowered to sign a peace with Great Britain or any other belligerent power, but that a separate peace with Poland is insisted upon.

NAVY TO HALT CABLE LANDING

Destroyers Patrolling Coast Outside Miami, Fla.

Washington.—Five naval destroyers are patrolling the coast outside the harbor of Miami, Fla., to prevent the landing of a cable line leading to the Barbados Islands and connecting there with a cable to South America, controlled by British interests. No international complications are anticipated, and officials said to cooperation of the British Government was expected to prevent the laying of the line until this Government gives its assent.

It is believed here that the British cable cannot be put down without the assent of this Government. Meanwhile, it was thought expedient to lay the cable from Miami to the Barbados, where it has been sleeping. On last Sunday he visited his family at Monterey, Pa. No need to hurry to the White House, and during his absence of two days no provision has been made for a substitute.

Despite the very encouraging reports, stories have been current, sponsored by Democrats themselves, that the President was paralyzed by the loss of his voice and was declining in health. These have been denied. Information coming from the White House is to the effect that the President has been paralyzed in one leg, but not sufficiently to prevent him from walking and even to get into his automobile without assistance by the use of a specially devised step.

WILSON OUT OF DOCTOR'S CARE

President Displays Great Mental Vigor

Washington.—President Wilson has made marked improvement in his physical health and displayed great mental vigor in the consideration of the domestic and international policies. This was the declaration made by Secretary of State Clegg after the longest cabinet meeting that has taken place since the President became stricken. The meeting lasted for more than an hour and a half and at its conclusion President and Mrs. Wilson went for a motor ride.

The President is doing more and better work than any man in Washington, continued Secretary Clegg, who comes more intimately in contact with the President than any other member of the cabinet. It is known that the President has had long conversations with Secretary Clegg on the Polish and Japanese situations and is ready to act should it appear necessary for this government to take a stand in any of these matters, more rather critical and tense.

The announcement by Secretary Clegg of marked improvement in the President's condition was accentuated by the departure of Admiral Grayson, who left for a two-day trip without leaving any abridgment in charge of his distinguished post, upon whom he has been in constant attendance since the early stages when the President was very ill. It was not until last week that Dr. Grayson thought that the President had improved sufficiently to allow the doctor to leave the White House, where he has been sleeping. On last Sunday he visited his family at Monterey, Pa. No need to hurry to the White House, and during his absence of two days no provision has been made for a substitute.

MISSUS FIGURES SEPTEMBER 15.

All Estimates In The Meantime Must Be Based On The Census Of 1920.

Washington.—Announcement of the 1920 population of the United States will be made about September 15. Census figures for the year 1920, or otherwise, are not authorized by the Census Bureau, Assistant Director of the Census W. M. Stewart announced.

"It is next to impossible to give an accurate estimate of the continental population at this time," Stewart declared. "The census of 1920, which was taken in 1920 by the United States Census Bureau, is the only reliable estimate of the population of the United States."

Officials in charge of tabulating the returns have stated the inability to determine in plain words, as a matter of good faith to our associates. "The census of 1920, which was taken in 1920 by the United States Census Bureau, is the only reliable estimate of the population of the United States."

Approximately one-third of Governor Cox's speech, which contained a list of 12,000 words and took nearly two hours for delivery, was taken up with a discussion of the League of Nations. He began by denouncing the Republican Senatorial class as conspirators who "planned and plotted with bigoted zeal" and for whom "political expediency" had dwarfed every consideration. "Either of the public interest or the maintenance of the honor of a great political party."
